

Assignment 1

#1

What happens when an assignment is performed without using let or const keywords in strict mode?

If we use “use strict” it is mandatory to use the let key word when we want to declare variables .but if we declare variable with out let under “use restrict” our programs will be error. “use strict” helps us to eliminate some java scripts silent errors by changing them to throw errors.in addition to this it will help us fixes mistakes that make it difficult for java scripts engine to perform optimization.

List of java script keywords

if, for ,else,let,while,do,function,static ,public,const,return etc

#2
